

## HoloDisplays Retail Price Guide

### Cable Hanging Kit

Top and bottom horizontal U-channel support bars are required on all screens wider than 50" to insure resistance to bowing or flexing of the screen surface along the horizontal axis.

Horizontal U-channel support bars (.5"x .5") are factory drilled tapped and installed on the screen.

Note: Cable hanging kits are available in the weighted type or the turnbuckle type for anchoring the bottom cables into the structure below the screen.

### Retail Price

Basic kit is \$168.00, plus cost of horizontal U-channel support bars.

Horizontal U-channel support bar material is \$8.40 per linear foot.

(Cost calculation: 2 X the actual width of the screen ÷ 12 = total linear Feet X \$8.40)
