

HoloRoadSho® Presentation Kit

Light weight (12 pounds) presentation kit consisting of a 36" diagonal (22" x 29") REAR or FRONT projection screen mounted in aluminum frame with attached swivel feet. All of one piece construction that slips into an over the shoulder fabric portfolio bag. Travels easily and sets up in minutes to present BRIGHT high quality images in ANY INDOOR LIGHTING CONDITIONS! Lights do NOT have to be turned down or off and your presentation WILL NOT "wash out" or "hot spot". An excellent display tool that brings life to trade show booths, traveling sales presentations, education instructions, small training seminars, point-of-purchase displays, power point presentations, etc.

FOR REAR PROJECTION
